COTS Monitor Remote Testing Checklist

Additional tests for submissions, permissions and recovery

Use this checklist while working remotely. Record actual results and evidence. Leave checks incomplete when you lack the required account, photo, site access or device capability.

Prepared 11 November 2026 | Philippine time

Tester _____ Date and time _____

Phone and Android version _____ App build _____

Connection _____ Last app update _____

Start with tests 3, 7, 9 and 11. Use practice sites and authorized test accounts where available. Avoid creating duplicate real monitoring reports.

While away from the laptop. You can record screenshots and results on the phone. A no-COTS survey needs a genuine survey and phone GPS at a configured site; mark it Blocked if you are elsewhere. If an app freeze or closure happens, note the exact time, model, photo count and step. Capture logs when laptop access is available.

Result choices: Pass / Fail / Blocked / Not tested. Do not uninstall, clear app data, change the phone clock or alter GPS to force a test to pass.

1 Separate photos from different sites

Needs: Phone and genuine photos from two sites

[ ] Select valid COTS photos from two different sites in one batch.

[ ] Submit and confirm they become separate submissions by site.

[ ] Check that each photo keeps its own GPS, time and model information.

Result _____ Evidence or record ID _____

Notes _____

2 Mix valid and invalid photos

Needs: Phone and photos with known locations

[ ] Select a valid site photo together with a photo outside every site.

[ ] Confirm the app identifies the problematic photo and blocks continuing.

[ ] Remove only that photo; confirm the valid photo remains available.

Result _____ Evidence or record ID _____

Notes _____

3 Prevent accidental double submission

Needs: Phone and a valid test submission

[ ] Tap Submit twice quickly.

[ ] Confirm Submit becomes disabled while processing.

[ ] Check that only one submission is created.

Result _____ Evidence or record ID _____

Notes _____

4 Cancel photo selection

Needs: Phone only

[ ] Open the photo picker, then cancel without choosing anything.

[ ] Confirm the app remains usable.

[ ] Repeat with existing selected photos; confirm canceling keeps them.

Result _____ Evidence or record ID _____

Notes _____

5 Remove and replace a photo

Needs: Phone and three valid test photos

[ ] Select three photos, remove the middle one and add a replacement.

[ ] Check the photo count and analysis results before submitting.

[ ] Confirm the removed photo is absent from the final submission.

Result _____ Evidence or record ID _____

Notes _____

6 Test photo limits

Needs: Phone and enough valid test photos

[ ] Try selecting more than 15 photos for initial Detection.

[ ] Try more than 10 photos for a Monthly visit when eligible.

[ ] Confirm the limits are enforced without freezing and skipped photos are explained.

Result _____ Evidence or record ID _____

Notes _____

7 Background the app during submission

Needs: Phone and two valid test photos

[ ] Start a two-photo submission, switch to another app and wait briefly.

[ ] Return and confirm the submission completes or remains recoverable.

[ ] Check for duplicate records and missing photos.

Result _____ Evidence or record ID _____

Notes _____

8 Lock the screen during submission

Needs: Phone and a valid test submission

[ ] Start uploading, lock the phone, then unlock it after a short wait.

[ ] Check whether the submission completed or can resume.

[ ] If still pending, confirm its photo remains available and Retry can recover it.

Result _____ Evidence or record ID _____

Notes _____

9 Check account separation

Needs: Two authorized Diver test accounts

[ ] Create a pending submission as Diver A, then attempt to sign out.

[ ] If sign-out is allowed, sign in as Diver B and confirm A's private records and pending photos are not exposed.

[ ] Return to Diver A and confirm the pending submission is still available. Respect any sign-out protection warning.

Result _____ Evidence or record ID _____

Notes _____

10 Check an unverified Diver

Needs: An authorized unverified test account

[ ] Attempt a valid test submission using an unverified Diver account.

[ ] Confirm it is not treated as an accepted monitoring record.

[ ] Check that any refusal or pending state has a clear explanation.

Result _____ Evidence or record ID _____

Notes _____

11 Check Admin permissions

Needs: Admin account

[ ] Open accepted, rejected and pending records; confirm their information is viewable.

[ ] Confirm Admin cannot approve or reject COTS or verify Divers.

[ ] Confirm Admin cannot decide partner, coverage or handover requests.

Result _____ Evidence or record ID _____

Notes _____

12 Check partner request permissions

Needs: Main Diver, invited Diver and Expert test accounts

[ ] Send a partner invitation and confirm the invited Diver must accept before Expert approval.

[ ] Confirm an unrelated Diver cannot approve or act on the invitation.

[ ] After Expert approval, check both Divers see the correct site team.

Result _____ Evidence or record ID _____

Notes _____

13 Check photos taken before partner approval

Needs: Approved partner and genuine dated site photos

[ ] Check a test record whose photo was taken before partnership approval.

[ ] Confirm it still receives the required Expert record review.

[ ] Compare with an eligible photo taken after approval; approval must not silently change older records.

Result _____ Evidence or record ID _____

Notes _____

14 Check monthly coverage boundaries

Needs: A temporary replacement assigned for one month

[ ] Confirm the temporary assignment displays the correct month.

[ ] Check that it does not appear as a permanent site handover.

[ ] Confirm replacement acceptance and monitoring completion are shown separately.

Result _____ Evidence or record ID _____

Notes _____

15 Check empty report periods

Needs: Admin or Expert account

[ ] Create a report for a month and site with no records.

[ ] Confirm the report clearly indicates no data and does not retain the previous report's values.

[ ] Return to a month with records and confirm its data reloads correctly.

Result _____ Evidence or record ID _____

Notes _____

16 Cancel and retry an export

Needs: Admin or Expert account and a PDF viewer

[ ] Open Export PDF, then cancel the save dialog if the device offers one.

[ ] Confirm the app remains usable and canceling does not falsely report a successful save.

[ ] Export again, then open the PDF. Mark Blocked if the platform does not offer a cancellation step.

Result _____ Evidence or record ID _____

Notes _____

17 Navigate after a validation error

Needs: Phone and a test submission

[ ] Trigger a validation error, such as leaving a required field empty.

[ ] Go back, correct it and continue; check selected photos and entered details remain consistent.

[ ] Confirm loading indicators and disabled buttons reset correctly.

Result _____ Evidence or record ID _____

Notes _____

18 Check larger text and landscape

Needs: Phone settings access

[ ] Increase the phone's text size and check Detection, Records, reports and dialogs.

[ ] Confirm important text and buttons remain readable and reachable.

[ ] Rotate the phone where supported; record fixed orientation as Not tested, rather than assuming a fault.

Result _____ Evidence or record ID _____

Notes _____

Issue report and test summary

Complete one issue report per failure. Send the screenshot and these details to the project team when you can reconnect.

Test number and title

_____

Account role

_____

Submission or record ID

_____

Model and number of photos

_____

Exact date and time in Philippine time

_____

Internet state and connection type

_____

Steps that caused the issue

_____

Expected result

_____

What actually happened

_____

Screenshot or video reference

_____

Session totals

Passed _____ Failed _____ Blocked _____ Not tested _____

Next tests to continue
